Abstract (en)  
[origin: EP0916911A2] The connection fitting for a heating radiator has a rising pipe (102) from the feed fitting (120). It carries the heating medium into one of the heating sections (12a) or heating plates. An additional rising pipe (104) connects one heating section (12a) with a further heating section (12b), so that the heating sections (12a,12b) are linked together in series. A takeoff (116) is an extension to the additional rising pipe (104), to link the second heating section (12b) to the return flow fitting (118).
