Abstract (en)

The retro reflecting dispersive mechanism has a plane network and orthogonal dihedral reflector which have adjustments allowing variation in the resonant cavity length formed.

Abstract (fr)

La présente invention concerne une source laser monomode accordable en longueur d'onde, à cavité externe autoalignée, comportant : une cavité résonnante ayant une face de sortie partiellement réfléchissante (331) et un dispositif dispersif rétroréfléchissant (31, 39), définissant un axe de collimation principal (351) et un axe de collimation secondaire (381), un guide d'onde (33) amplificateur placé à l'intérieur de la cavité résonnante. Le dispositif dispersif rétroréfléchissant comporte un réseau plan (31) ayant des plans de dispersion et un dièdre réflecteur orthogonal (39) dont l'arête (391) est parallèle au plan de dispersion du réseau comprenant les axes de collimation (351, 352). <IMAGE>
