Abstract (en)

[origin: EP0917364A2] The headset (1) has a speech unit (3) with a microphone and loudspeaker or earpiece, a camera (4) and a signalization device (5) with a laser pointer (15), attached to the headset, or integrated within it. The signalization device is controlled by received remote-control signals (12) provided by a control center (2), for controlling the beam direction of the laser pointer. An independent claim for a remote maintenance and video conference system employing a headset for data communication with a control center is also included.
