Abstract (en)

[origin: EP0917835A1] A sole (1), which has an elastic arched section and reflex zone points, comprises a primary lower layer (2) made of non-allergenic rubber, and a secondary thin upper layer (3) made of a soft material which comes into contact with the sole of the foot. One layer is located on top of the other, and alveolate sections (6) are formed near the reflex zones, which contain individual particles (8) of rubber and form arched members.
