Abstract (en)

[origin: EP0917965A1] The stitcher has several components, e.g. a stitching station (22), sheet feeders (12,14,16,18) and collecting chain (20) each with their individual drive motor. Each motor has its own control unit. The control units are interconnected to provide for interchange of information and control signals. An independent claim is included for a method for controlling the drive.
