Abstract (en)

The invention relates to adhesive labels protected against forgery for marking and/or stamping goods and/or documents, consisting of separate foil material parts with identifying symbols and/or patterns on one side and an adhesive layer on the other side, and being part of one or more corresponding series of separate labels each of which is individually provided with a sequential marking while the labels are each provided with means for counteracting their forgery. The invention furthermore relates to a method for marking and/or stamping goods and/or documents by means of such adhesive labels, whereby more specifically at least two identical series of separate labels can be used and corresponding labels can in each case be adhered to at least two goods and/or documents which have a connection with each other. <IMAGE>
