Abstract (en)

[origin: WO9733694A1] A device for cutting action upon objects comprises cutting means (2) having cutting edges (1) and being rotary-arranged, which is characterized in that the cutting means (2) comprise a number of discs arranged side by side being provided with a substantially circular periphery and having cutting edges for said action. The invention also relates to the use of this device for cutting action upon sacks, string bags, bags and cardboard boxes for opening thereof and releasing of the contents therein as well as for cutting action upon piece-like, sticky material.
