Abstract (en)
[origin: DE19519544A1] The appts. for removing liquid from the surface (O', O'') of a strip (B) transported by a strip processing machine (in particular, a roll stand) by means of a gas jet (G) is provided with a gas delivery nozzle (2, 4, 5) and a suction opening (8a) for removal of the resultant gas and liquid mixture. The gas jet (G) is directed in a flow over the strip towards at least one of the strip edges. The strip edge targeted by the gas flow is provided with a suction opening (8a).
