Abstract (en)

[origin: WO9801244A1] This device comprises: a first assembly (10, 12, 14) for moving the machine part; a second assembly (18, 22) driven in rotation mounted on at least one bearing; a linking piece (16) mounted via a first linking axis (30) on the first assembly and via a second linking axis (34) on the second assembly, the axis (40) defined by the at least one bearing being offset relative to the second linking axis (34).
