Abstract (en)

[origin: DE19632843C1] The invention relates to a profiled frame (10) for a mobile window pane (13a), for the rear door of a motor vehicle in particular, comprising individual profiled sections (11a, 11b, 11c) made of an elastomer material, joined to each other with a thermoplastic material. A frame (12) for a fixed window, made entirely out of the same thermoplastic material, is provided. The profiled frame (10) presents a homogenous external side on its entire perimeter, consisting of the thermoplastic or elastomer material.
