Abstract (en)

[origin: DE19634225A1] A connection device for bicycles, in particular for connecting a first hauling bicycle to a second hauled bicycle, has traction means (5) arranged on a rear structure of the first bicycle and a fastening device secured to the hauled bicycle and connected to the first traction means (5). In addition, a supporting device (20) is secured to the first bicycle to support the connection device and a coupling device (45) connects said traction means (5) to a fastening device (10).
