Abstract (en)  
[origin: WO9801460A1] Disclosed are methods and compositions relating to the diagnosis and treatment of breast and related cancers. Compositions and methods for the detection of the BRCA1 gene product in vivo and in vitro are disclosed, as well as methods for diagnosing aberrant localization of BRCA1 protein in cells using anti-BRCA1 antibodies. Also disclosed are methods for identifying BRCA1-associated proteins which function in the proper translocation of the BRCA1 gene product to the cell nucleus.
