Abstract (en)

[origin: US5887282A] A glove with an integrated wrist strap for a pole, such as ski poles, cross-country poles, hiking sticks, walking sticks and the like has an upper surface that defines a palm side, a back side, a wrist part and a thumb joint part. The wrist strap is formed integrally with the glove and includes a circumferentially adjustable loop part that wraps around the wrist part, an attachment part which extends on the palm side of the glove in the region of the thumb joint part, and a pull tab which extends on the outside of the glove. Also included is a binding element which is attached to the attachment part and the pull tab. The binding element, the attachment part and the pull tab are located adjacent the thumb joint part on the palm side of the glove. The pull tab is embodied as at least partly elastic and secured releasably to the upper surface.
