Abstract (en)
[origin: EP0919505A1] A winding unit, particularly for winding yarns, includes a winding head provided with a device for guiding and cutting a yarn and two supports (11, 13, 19, 21). Each support is adapted to rotatably support a cardboard tube (25) which is adapted to wind the yarn in order to form a bobbin. The head has two winding positions and each support has a position for supporting the winding tube for winding the yarn and a disengagement position for unloading the full bobbin and loading a new tube. <IMAGE>
