Abstract (en)

The jib has a cable (4) guided over a device located on the base body (G) and adjustable in its angular position after the fashion of a tensioning frame. The jib, via the cable, can telescope in or be tensioned, and upon demand the tensioning device can be pivoted from a neutral position to a working position. The cable is guided externally along the jib. The tensioning device comprises a pivoting rod (2) with a roller (3) over which the cable passes, and a piston and cylinder unit (6) by which the rod is movable into its desired angular position.

Abstract (de)

Ein teleskopierbarer Ausleger (5), insbesondere für Fahrzeugkräne, umfaßt eine abspannbockartige, verschwenkbare Vorrichtung, mit deren Hilfe ein zum Einteleskopieren der Teleteile vorgesehenes Rückholseil (4) als Abspannseil benutzt werden kann, sofern erforderlich. Dieses Seil (4) verbindet das äußerste (letzte) Teleteil mit dem Grundkörper (G) des Auslegers (5). <IMAGE>
