Abstract (en)  
[origin: EP0919777A2] The water feed circuit has separate hot and cold water supply lines (1,2), each coupled to the sanitary fitting mixer tap (7), provided by a thermostat valve, allowing water transfer from the hot water line (1) to the cold water line (2) when the tap is closed and providing a selected water temperature when the tap is open, with a single nonreturn valve (3) for the hot water line.
