Abstract (en)
[origin: EP0920907A2] A mixing and dosing vessel, for cosmetic or pharmaceutical products and similar, has a container body (10) with a cylindrical inner space. It has a tapered outlet (12) at one end with the other end structured to take an inserted piston unit (26) with a sealed passage (32) for it to drive the mixer. A drive (40, 42, 44) engages the passage (32), when the drive shaft has been withdrawn, to connect with the container to move the piston unit (26) towards the outlet (12), when the manual drive (42) is operated.
