Abstract (en)
[origin: EP0921248A2] The invention relates to a strapped suspension device (1) for suspending section girders (2), consisting of a plate strap (3) which encompasses the section girder (2), the strap ends (4, 5) of said plate strap being interconnected, and a suspension rod (11) which is connected to said strap ends (4, 5). A plate clip (6) is punched out of and shaped from one of the strap ends (4) and extends through an opening (10) in the other strap end (5). The suspension rod is a threaded rod (11) which projects through the plate clip (6) and bears a nut (12) below said plate clip (6).
