Abstract (en)  
[origin: DE19755467C1] The arrangement (1) includes a coin channel (2) as well as an arrangement for stopping the coin, containing a revolving pressure element (4) with wedge surface areas (9,10). The pressure element contains an inlet (6) arranged in parallel to a wall (5) of the coin channel, which is limited by a side guide (7). The coin guide arrangement includes a track (3) following the pressure element. The pressure element comprises preferably an inlet slope (8) in the passage area from the inlet to the wedge surface areas, and preferably a first (11) and a second thigh (12) with a first (9) and a second wedge surface area (10).
