Abstract (en)
[origin: WO9808499A1] This invention relates to a composition comprising benzoic acid or a derivative of benzoic acid capable of giving rise to free benzoic acid in vivo for use as a medicament for animals, wherein said acid/derivative functions as an antibiotic, promotes growth, decreases feed conversion and improves digestibility of amino acids administered in animal feeds. The benzoic acid or its derivative can be administered to the animal either in its feed composition or in its drinking water. It is particularly effective in pigs.
