Abstract (en)

[origin: WO9749620A1] The invention discloses a dispensing device for a fluid product comprising a dispensing unit (1) provided with an axially movable control head (2) and a reservoir (3) containing the fluid to be dispensed, the said dispensing unit (1) being fixed on the reservoir (3), characterised in that the device further comprises means (4) for blocking any axial movement of the control head (2), and unlocking means (5) for engaging to the said blocking means (4) to cancel the action of the said blocking means (4) on the control head (2) and thus allow the axial movement of the said control head (2).
