Abstract (en)

[origin: WO9809038A1] A covering from flexible and elastic shaped belts, especially for surface layers in interiors and exteriors. The shaped belts (1, 1a, 1b) form two systems crossing one another and each of the belts consists of at least two face parts (2, 2a, 2b) and connecting pieces (3, 3a, 3b) between them and at the ends of the shaped belt (1, 1a, 1b). The face parts (2, 2a, 2b) are provided at their areas being at the same plane as the areas of the connecting pieces (3, 3a, 3b) with a through-recess (4, 4a, 4b), the dimensions of which through-recess (4, 4a, 4b) correspond to the connecting pieces (3, 3a, 3b). The shapes of the face parts (2, 2a, 2b) of the intersecting systems of the shaped belts (1, 1a, 1b) complement one another forming a continuous area and the height of the connecting pieces (3, 3a, 3b) equals the depth of the through-recesses (4, 4a, 4b).
