Abstract (en)
[origin: WO9809044A1] The invention relates to a frameless glass door (28) with frameless side panel (33) which may be fitted with strips (3) and locks (2) etc. between two parting panes spaced one from each other. For that purpose, one intermediate (8) is form-fitted and non-positively secured between the panes, on the long side of the door, using an appropriate glue. Strips (3) are affixed on this intermediate, either directly or by means of lead-in parts (9). Using this device, the strip may be fitted in the three degrees of freedom.
