Abstract (en)

[origin: WO9809306A1] A mobile switching device (7) for a low-voltage power switch (1). Said device presents a contact lever support (11) accommodating several contact levers (10). The contact lever support (11) comprises a base body (26) and additional parts (28) which can be added to it, along with swing-out mounting supporting arms (17) for connection and disconnection. By combining the base body (26) and additional parts (28,30) it is possible to produce contact lever supports with various overall widths for adjustment to a desired rated current.
