Abstract (en)

[origin: EP0922621A1] The bellows is a corrugated or folded bellows and the corrugations or folds form a one-piece member. The textile insert is in the form of a knitted fabric which is vulcanized between two elastomer layers. The weight fraction of the textile insert to the elastomer component is between 15 and 50, preferably 40%. An Independent claim is also included for the method of manufacturing the bellows.
