Abstract (en)
[origin: EP0922651A2] A packaging arrangement holds a number of relatively thin products in a dust-proof enclosure with a seal. The packaging material is carton or cardboard, machine formed and filled. The package also has a tamper-evident seal and may be re-closed. The packaging consists essentially of matching rectangular front and rear sidewalls which are joined on three sides by a thin adhesive blister pack coat. Flaps on the front and rear side walls adjacent to the fourth side, fold and close over the fourth side.
