Abstract (en)
[origin: EP0922815A2] The block (10) has at least one through bore (20) with a cover layer (22) that forms a support surface for fastening screws. There is at least one fixing element for attaching a connector and the bore and the fixing element are aligned and arranged with a set spacing between the blocks. There may be one or more recesses (40) in the upper and lower faces of each component and at least one projection (50) on the other side of the component. The projection on one component can fit into the recess in an adjacent component.
