Abstract (en)
[origin: US6217085B1] Connection for, on the one hand, a male ejection joining piece (23) of a fuel cartridge (20) intended to supply compressed gas to a compressed gas attachment device and, on the other hand, a male inlet joining piece (32) of a device (30) for inletting compressed gas into the device, comprising sealing means (11) intended to ensure the sealing tightness of the connection between the two joining pieces (23, 32) and a female seal support (1) arranged to receive the two male joining pieces (23, 32). The sealing means (11) are arranged to extend right across the seal plane of the two male joining pieces (23, 32). The invention applies well to stopper attachment devices with a compressed gas-propelled plunger.
