Abstract (en)
[origin: EP0922904A1] The lamp consist of a support for carrying a light which is attached to and suspended from two wire cables (5) which form part of the supply for the light. The light can be deviated by a counterweight (9) attached to the two cables across a pulley unit attached to a ceiling. The counterweight is provided with a further light (19) which is also supplied in part by the cables. The counterweight is built as a spherical hollow body in whose inner space the light is located. The counterweight has openings which form a connection between the inner space and the surroundings.
