Abstract (en)
[origin: EP0823215A1] Provided are novel bacteria belonging to the species *Photorhabdus luminescens* which possess insecticidal activity which is not dependent on these bacteria being carried by a nematode infection vector. Live or inactivated *P.luminescens* cells, as well as fragments of such cells and supernatants of culture of insecticidal *P.luminescens* bacteria, are used in accordance with the invention as insecticidal agents for the treatment of insect infestation of plants.
