Abstract (en)

[origin: DE19624149A1] A preparation for wall decoration, especially for applying a surface coating with a rough surface structure giving a rough, glossy or glittering effect, consisting of a slurry of fibres, fillers, binders and possibly colorant in a dispersion liquid, contains a fibre mixture of fibres or bunches of fibres of different lengths, thicknesses or material quality and colours, the filler consists of crushed products of ground natural minerals and/or solids with grain sizes between 0.2 and 35 mm, and an adhesive base material for embedding fibres and minerals in the form of substrate containing binders, an amorphous solid and a liquid.
