Abstract (en)

[origin: DE19635583A1] An optoelectric transmission and/or reception module for the transmission of a signal by means of an optical waveguide (1) wherein an optoelectric transmission and/or reception unit is lodged in a housing presenting a carrier plate (2), a cover (3) and a window (4). According to the invention the cover (3) presents an optical waveguide connection device (7) so designed that the optical waveguide connection device (7) can be adjusted with regard to the optoelectronic unit (5) before it is definitively fastened.
