Abstract (en)  
A dispenser for fluids has a pump action fitting on top of a supply duct (8) and with a parallel dispensing duct (17) with an outlet (16) at the lower end. The inside of the dispensing duct is fitted with a core (68) which closes off the dispensing jet and which defines the fluid path between its outer profile and the inner wall of the duct. The duct is set eccentric to the dispensing duct and provides a simple mixing and atomizing action on the fluid.

Abstract (de)  
Ein Spender-Kopf (2) weist einen schwenkbaren Austragstutzen (17) auf. Dessen Auslaßkanal (15) ist von einem Innenkörper (22) begrenzt und liegt seitlich benachbart zur Stutzenachse (11). Dadurch kann das Medium unter mehrfacher Umlenkung feinst zerstäubt ausgetragen werden. <IMAGE>
