Abstract (en)

[origin: EP0924071A1] The method involves applying a pneumatic pressure on an ink cartridge (1), determining a position of a cartridge butt (5), and opening a cartridge valve (7). The cartridge butt is moved into a preset nominal position, and the cartridge valve is closed at reaching of this position. The method further involves supplying ink in a printing machines with an ink box associated with a cartridge held in a fixture. The cartridge comprises an adjustable butt which is pneumatically driven, and a lockable outlet aperture. An Independent claim is included for an ink supply arrangement.
