Abstract (en)

[origin: EP0924960A2] The suspension has a panel (10) made up of a core layer (11) and two outer layers (12.1,12.2) on either side of the core layer, a holder and elastic attachment devices which join the panel to the holder. The elastic attachment devices are formed from the core layer and/or at least one of the outer layers. The core layer has holes (20). A fixing part (14) can be passed through at least one hole.
