Abstract (en)

[origin: WO9810908A1] The present invention relates to a method and a device for cutting board, in particular gypsum board, and for the purpose of providing a technique which will give more precise and finer cuts of standard board lengths (L1 ... Lm) in order thereby to obviate unnecessary waste cutting, there is according to the invention suggested a method and a device characterised in an initial set of cutting means (6n) which can be adjusted at intervals corresponding to an initial set of finished lengths (L1 ... Lm) for multi-cutting of such lengths, as well as an additional set of pre-adjustable cutting means (8n) which act as back-up sets or come into effect when other sets of finished lengths are to be multi-cut.
