Abstract (en)

[origin: US6246342B1] Man-machine interface (MMI) for airport traffic control purposes, in particular for safe taxiing and/or approach-departure control at an airport, having a display area on which processes and states at the airport, for example the movements and the current position of aircraft, the switching state of lighting systems, etc., can be displayed and influenced. The display area is designed with a screen whose diagonal is more than 19 inches, preferably more than 21 inches.
