Abstract (en)

[origin: EP0925814A2] The inline skate has an under-part (2) connected to a sole (12). An element is positioned in the under-part in the rear third of the sole, which is operated by the body weight of the user via the heel of the user's foot (7). It is connected to one or all brake elements (11). The element is a pedal (9), fastened to the sole via a return spring (10) etc. The pedal is connected to the brake elements directly or via a bracket, which is connected to the roller carrier (3).
