Abstract (en)
[origin: EP0926433A2] The light has a plastic housing and a plastic attachment element (2) with a first connecting section with a first connecting element (5) and pref. a third connecting element, whereby the first connecting element is a rotary connecting element. The housing has a first end section (3) and a second end section (4), each with a second rotary connecting element (6). The first connecting element can be optionally connected to the second connecting element of the first or second end section. An independent claim is also included for packing for producing a usable light.
