Abstract (en)
[origin: EP0926653A1] The tubular profile stand provides a simple support for the display panel. The display panel includes a foot and stand (1) and a frame (2) attached to the stand, which consists of a single tubular profile (4) with a bracket (5) attached to the top. This bracket is clamped around the horizontal lower edge of the frame (2). The width of the tubular stand in the direction parallel to the lower frame member is between one tenth and one third of the total length of the frame. The tubular stand may be made of steel of thickness between 3 and 6 mm. A base plate (6) is attached to the lower end of the tubular stand.
