Abstract (en)

[origin: EP0927529A1] One part of the table top (19) forms the pivot part (22). The at least one pivot part is a single table top part extending from one to the other table edge. On the frame (13) at least one pivotable arm (29) is arranged and the height-adjustable table top part (21), the pivot part (22), the frame (13) and the at least one pivotable arm (29) are articulatedly connected to one another in the form of a parallelogram. Under the table top a motor (33) is fitted and on the pivot part or on the pivotable arm is a lever (31) working in conjunction with the motor (33) in order to raise or lower the height-adjustable table top part by varying the pivot angle (alpha).
