Abstract (en)

The press has a frame (2) in which is located a drive shaft (1) on which at least one connecting rod unit (8) is eccentrically located. The connecting rod unit is connected to a pressure column via a rocker member (27,28) to which a one-armed lever (33,34) is articulatedly connected. The rocker member is point-symmetrically formed and is located in the press frame at its symmetry point.
