Abstract (en)  
The trestle has a connection (14) to a conduit for feeding screed into an impact container (12) open at the base. The container is located in a dismantlable housing (11) having a jacket, a top ring (13) and a bottom ring (15). The jacket forms a collar in front of the lower ring, on which stands a free edge of the container. At least three pipe-shaped retainers are formed on the jacket. These retainers have openings at their tops which are covered by tongues from the top ring. The bottom ring has eyelets which correspond to the lower openings of the pipe-shaped holders.

Abstract (de)  
Bei einem Auslaufbock für die Estrichförderung und -herstellung mit einem Anschluss (14) an eine Leitung zur Zuführung von Estrich in einen Pralltopf (12), der an einem Gestell angeordnet und nach unten offen ist, soll der Pralltopf (12) in einem zerlegbaren Gehäuse (11, 13, 15) angeordnet sein. <IMAGE>
