Abstract (en)

[origin: WO9813560A1] An assembly comprising a plate-shaped floor member (2) provided with a plate (3) and at least two ribs (4) between which a trench (8) is present. At least one rib bounding the trench is provided with at least one passage (5), which extends from said trench to a side of the rib remote from said trench. The assembly furthermore comprises at least one conduit (9) present in the trench, which conduit extends through said passage. The ribs are present on the upper side of the plate, with a plate-shaped covering (7) being present on or between said ribs on a side remote from said plate.
