Abstract (en)

A corkscrew usable for bottles having regular and flanged mouths, having a frame (2) forming an inlet (3) which can be arranged on the mouth (12,14) of a bottle and surrounds the worm (4) which can be inserted in the cork of the bottle. A particularity consists in that an adapter ring (10,10a) is provided which can be coupled to the inlet (3). The adapter ring (10,10a) forms a first abutment (11), which can engage a regular standard bottle mouth (12), and a second abutment (13), which can engage a flanged bottle mouth (14). <IMAGE>
