Abstract (en)

[origin: EP0928862A1] The invention relates to a sealing construction for a pipe (20), such as a flue gas discharge pipe or a ventilation pipe, through a roof. According to the invention the sealing construction is arranged on the inside of the roof and comprises a frame portion (31,32) and a flexible sealing ring portion (33). The invention provides in this way a sealing on the inside of the roof which prevents condensation in the roof construction, aesthetically speaking looks good and prevents loss of energy. <IMAGE>
