Abstract (en)
[origin: DE19635555A1] The invention concerns novel aqueous washing-up agents containing (a) monoglyceride (ether) sulphates, (b) anionic surfactants and/or (c) non-ionic and/or amphoteric or zwitterionic surfactants. The agents are characterized not only by their exceptional dish-washing power but also by particular foam retention, even when the washing-up water is very greasy. The novel washing-up agents also have exceptional dermatological compatibility.
