Abstract (en)

[origin: WO9814652A1] The invention concerns a mechanical loom with at least one control panel (18) for controlling a drive system. According to the invention, the control panel is held by means of a support (16) which is mounted on a holder part (12) of a functional element (9), which holder part (12) can be adjusted and secured in the width of the mechanical loom.
