Abstract (en)
[origin: WO9749888A1] The invention relates to a sunshade for windows or doors, in particular for roof windows (1). Said sunshade comprises a flexible sheet (2) and a holding device (3) which can fix said sheet (2) to the outside of the window (1) or the door. Said sheet (2) consists of a roller blind engaging over the window (1) to cover the surface and to project beyond the window frame (4). Said roller blind is mounted with the winding roller (5) thereof in a box (7) which is in the lower window area and is attached preferably to the lower transverse spar (6a) of the window frame (1) or the window casement (6). Said blind can be detachably fixed by the removal end (2a) thereof to holding devices (3) provided on the upper transverse spar (4a) of the window frame (4).
