Abstract (en)

[origin: DE19719254A1] A collector (18) for a motor vehicle heat exchanger has a structure in at least two parts, with a tube bottom (26) and a lid (28) which together form the housing of the collector (18), possibly with at least one additional component part. A partitioning (30) made of crossing flat strips (32, 38, 40) is arranged in the collector (18). The partitioning (30) is an integral diecast piece made of a weldable material
